A New Motor Fuel
Benzol, A By-Product of Coke, Now Being Experimented With.

Thousands of gallons of Benzol, a by-product of coke, are now being used for motor fuel. While being much more combustible than gasoline, benzol has not yet reached the highest stages of refinement, and present results are best when it is mixed in equal proportions with gasoline. Heat and cold also have a total effect upon it. It is used in gasoline. Ford chemical laboratories, however, are doing a great deal of experimenting and soon hope to be able to refine it so it can be used alone and under all conditions. Of course, its chief effectiveness comes from its combustible power, which is greater than gasoline. Ford officials state there is no possibility of benzol ever displacing gasoline as a motor fuel, since it is a by-product of coke and therefore obtainable only in limited quantities.

The nearer you get to a dollar the smaller it looks.

TO WOMEN OF MIDDLE AGE

This Woman's Letter Tells You How To Pass The Crisis Safely.

Lacelles, P.Q.—"During the Change of Life I felt so weak and run down I could hardly do my work. The perspiration would pour down my face, I couldn't eat what I was doing. We live on a farm, so there is lots to do, but many who felt as I did would have been in bed. I took Lydia E. Pinkham's Vegetable Compound and it did me a world of good. I tried other remedies but I put Vegetable Compound ahead of them all, and I tell every one I know how much good it has done me."

Mrs. DUNCAN BROWN, Lacelles, Prov. Quebec.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dizziness, palpitation, timidity, sounds in the ear, palpitation of the heart, spots before the eyes, irregularities, constipation, variable appetite, weakness and distress should be heeded by middle-aged women, and let Lydia E. Pinkham's Vegetable Compound carry them safely through the crisis as it did Mrs. Brown.

You are invited to write for free advice. No other medicine has been so successful in relieving women's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass.

Shipping Grain to U.S.

Large Shipments of Alberta Wheat And Oats Go To The United States

Wheat valued at more than one million dollars has been shipped from the province of Alberta to the United States and chiefly to the state of Montana from January 1, to April 30, 1920, states S. C. Reat, United States consul at Calgary, Alberta. During the same period more than one million bushels of oats were also shipped across the line.

Most of the wheat was shipped across during January and February and the highest price paid was \$3.25 a bushel, while the average was \$3.06. Oats averaged 60 cents a bushel and one shipment \$1.05 was paid. The large shipments of wheat during the first part of the year were caused by the lifting of the embargo on wheat in the United States on December 15. The demand for oats, especially in Montana, created a good price, and that, together with the exchange situation, were big factors in increased shipments of oats.

During the first four months of the year, a total of 374,430 bushels of wheat, valued at \$1,157,562.82 were shipped into the United States from Alberta, as compared with 30,085 bushels valued at \$76,040.81 during the last quarter of 1919. The fact that the embargo was not lifted until December 15 must be taken into consideration in comparing the two periods. A total of 1,131,090 bushels of oats valued at \$674,319.55 were shipped out during the first quarter of this year, as compared with 77,985 bushels, valued at \$52,109.99 for the last four months of 1919.

Lift off Corns!

Doesn't hurt a bit and Freezons costs only a few cents.

With your finger. You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezons" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without a bit of pain or soreness. Truly! No humbug!

Bolsheviks Lowest Types of Humanity

First Hand Information Acquired In Intelligence Department

"If once the Russian people were freed and allowed to vote the Bolshevik regime would vanish like smoke, but they are kept down by machine guns and massacres," declared O. D. Stevenson, B.A., of Toronto, a former Stratford boy, at a chamber of commerce luncheon. Mr. Stevenson told of the red movement from first-hand experience, while in the British intelligence department.

The Bolsheviks he termed the lowest type of humanity who are living by blood and fire with German money and organization to a large extent, but not entirely behind the movement.

After quoting a literal translation of a proclamation taken from the walls in many towns of Russia, of "Nationalizing Women," Mr. Stevenson said that tens of thousands of decent women committed suicide. Those who refused to be nationalized were tortured in a most fiendish manner and then ravished until they died, after which their bodies were quartered and hung up to frighten others.

With a threat of torture recruits for the Bolshevik ranks were secured. "In one city no larger than Toronto," said Mr. Stevenson, "over 150,000 persons were massacred in three or four months. One of the main streets had, when we entered, between 8,000 and 10,000 dead bodies hung on poles, posts, trees, etc., the men with their vital parts hung around their necks, their eyes pulled out, with iron caustics nailed to their shoulders and horseshoes nailed to their feet. One cannot conceive of any human being acting in the way these devils in human form acted. A dead set was made against religion, and many of the priests were crucified at their altars."

"You look worried tonight, William," said the rural editor's wife, "is anything wrong?" "Well, rather," replied the local molder of public opinion. "An indignant subscriber came into the office this afternoon and nearly punched the life out of our person." "My goodness!" exclaimed the editor behind the press. "I hope he didn't stop his paper."

Better Farming Train

Five Weeks' Demonstration Tour Through Saskatchewan

The better farming train, consisting of 13 cars, has started on a five weeks' tour. The train was made up by the Saskatchewan College of Agriculture, the Saskatchewan departments of agriculture and education and the Canadian Pacific railway. By their joint efforts undoubtedly this train will be better equipped and arranged for its purposes than any during the five years since these trains were started. All the cars, with every available inch utilized, are filled with demonstration material of a most interesting nature and valuable for instructional purposes. F. H. Auld, deputy minister of agriculture, followed by Capt. Thos. Acheson, of the railway company's agricultural department, opened proceedings on the train and anticipated a highly successful tour and hope to accomplish much good.

Never Lose Your Nerve

American Doughboy Who Refused to Be Counted Out

If you are going to die do it with your boots on, advises the Mystic Worker. A young doughboy was brought in from the field to the hospital. He was a splendid specimen of American manhood. The army surgeon examined his wounds, shook his head and sought the chaplain.

"The boy cannot live," he said, "and I think it best that you tell him so."

The chaplain went to the doughboy's bed, leaned over and whispered: "Doc is a little discouraged, Buddy. Doesn't think there's much of a chance. Is there anything I could do for you, old man?"

"You mean I am going West?" the boy weakly asked.

"But he didn't say how soon, you want say by me personally?"

"You know—I'd do it. Isn't there something I could do for you?"

The boy understood. He pointed to his coat, and said, between painful breaths:

"My inside pocket."

The chaplain got the coat, felt the inside pocket and extracted a pocket-book. When he held it up the boy nodded.

"Open it," he said.

The chaplain found it contained a ten dollar bill.

"What shall I do with it?" he asked.

The boy smiled grimly as he answered.

"Bet you ten dollars that I don't die."

The boy won.

The Age We Live In

Moralists and Preachers Find Much To Condemn

There is now a general craze for frivolous amusement; popular entertainments, the reverse of edifying, are crowded, and much written about; money is plentiful, and is spent like water on them and on personal adornment. Such changes cannot be rebuked, and though the war and its sequels may be the cause, they afford no excuse. In all classes of society moralists and preachers can find much to condemn. But condemnation, timely as it is, is not in itself a remedy; nor is it easy to see where the remedy lies. Perhaps the chief and most general enemy of national thought and behavior lies in what a living poet has called "the leanness of the ungenial mind." Social reform in the future is to be looked for increasingly in the field of knowledge. The mass of the nation is not vicious but ignorant—London Times.

Improved Mathematics

The teacher had been explaining fractions to her class. When she had discussed the subject at length, wishing to see how much light had been shed, she inquired:

"Now, Bobby, which would you rather have, one apple or one half?"

The little chap promptly replied: "Two halves."

"Oh, Bobby," exclaimed the young woman, a little disappointed. "Why would you prefer two halves?"

"Because then I could see if it was bad inside."

Western Building Program

Huge Expenditure Involved In Building Operations This Year

The building program in Western Canada, for which it is estimated \$85,000,000 will be spent, includes the building of fifty new branch banks, 25 churches 60 public garages, 10 hospitals, hotels and institutions, 10 mills and factories, three parking plants, two power development schemes, Canadian Pacific Railway docks and stations, technical school at Calgary, Universities at Saskatoon, Edmonton, 10 new ships at Vancouver and Victoria, and an irrigation scheme at Sarnia Lake, B. C., which has already been commenced, and which will reclaim a vast acreage of land, costing \$2,000,000.

In Japan practically no women except a few uniformed girl students wear shoes.

Dust from shoddy mills is used as a fertilizer in England.

SNUFFS OUT A COLD IN A FEW MOMENTS

Clears The Nostrils, Stops Sneezing, Heals The Throat Quickly

Catarhazone Works Wonders

Lots of people used to let their cold "work out." They suffered a whole lot, sneezed around the house, till the whole family finally caught the infection.

Nowadays colds are cured by Catarhazone before they really get a good start. This healing vapor, full of pure essences, gives instant relief. It fills the breathing organs with a fresh, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely safe for Catarrh, and in throat trouble it works like a charm. Catarhazone is a permanent cure for bronchitis and throat trouble. Not an experiment, but a cure that's guaranteed. Get "Catarhazone" today, and beware of substitutes. The dollar outfit is guaranteed, and small size 50¢; trial size 25¢, at all dealers.

Americans Interested In Western Lands

New York Financial House Investigates Lethbridge Irrigation Project

Investigation of the Lethbridge Northern Irrigation Project by two New York financial houses of high standing, will be undertaken in the immediate future with a view to purchasing the bonds of the irrigation district, it was asserted by L. M. Roberts, a leading barrister, on his return to Calgary from New York. Mr. Roberts, who some time ago obtained an open option for the purchase of the bonds, went to New York in this connection. He anticipates that the inquiry into the irrigation undertaking by engineers sent out by the financial houses will take place in June. The terms of his option are not such as to interfere with the rights of the irrigation district to make any other arrangements for the sale of the bonds which they may desire, and in the event of a definite offer being made the district will have the right to accept or refuse.

Alfalfa Cultivators

Proper Methods to Follow in Order To Ensure Success

Alfalfa may be sown with a nurse crop in parts with a good rainfall if the seeding down is done on land that is not more than one crop from barley or a bushel and a peck of oats per acre is heavy enough seeding for a nurse crop. In the drier sections of the provinces and on land that has not been summer-fallowed or in the wetter sections, seeding without a nurse crop will give much better results. When seeding with a nurse crop the alfalfa should be sown at the same time as the nurse crop. When seeding alfalfa alone, the land should be summer-fallowed or, if the previous year, seed of June may be planted until the first of June and may then be seeded. Stubble should be plowed and sown worked in the spring until June and then seeded. Fifteen pounds per acre is the usual rate of seeding.

Northern grown alfalfa seed of the Grimm, Tarkenton or Baltic varieties must be used, Grimm being harder than either of the other two. Before sowing the land or the seed must be inoculated with alfalfa nitro culture unless the land has grown alfalfa or sweet clover previously. Of the two methods, inoculation of the seed is usually easier, and gives good results. If these two precautions are taken, the first steps necessary to success are assured.—N.D. McKenzie, Supt. Indian Head Experimental Farm.

Motors and Mud

He Who Hesitates On a Muddy Road Is Stuck

When crossing muddy places in a road care should be taken, as depressions may be covered with water, and if these are crossed too fast it may cause a broken spring. It is by far the best to change to a lower gear before entering a muddy stretch of road and then cross steadily at a moderate speed. Never hesitate, for he who hesitates on a muddy road is stuck. Apply just enough power to propel the car, but do not cause them to spin. The wheels should exert far less push than wheels that are slipping and pushing steadily. Remember shifting gears in a mud-hole will lose a few moments at a most critical time, and this loss may be just enough to stall the car in the mud.

Calgary to Have Another Theatre

A half million dollar moving picture theatre will be built in Calgary, Alberta, by the Famous Players Corporation, Limited, of New York, this summer, construction work being commenced as soon as the city council issues the necessary permit.

"The theatre is being built with an eye to the future, rather larger than present requirements, but the promoters have great faith in the future of the city and have no doubt that a very few years will see it fully justified," says H. Nathanson, representative of the corporation.

Strangers to Truth

The preacher announced that next Sunday his subject would be "Lies" and that he would be very glad if during the week, they would read the 17th chapter of Romans for themselves.

The next Sunday the preacher commenced by reminding his hearers of the request he had made, and asked if those who had read the 17th chapter of Romans stood up. To his astonishment half the congregation stood up.

"Thank you very much" said the preacher, "now it is to you I want to speak today, because there is no 17th chapter of Romans!"

A Losing Game

He—Life with me has been a failure. She—You must have had and wasted some opportunity.

He—No; I have spent half my life raising whippers to conceal my youth, and the other half in dying them to conceal my age.

DANDERINE PUTS BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses—

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or falling. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

The Only Safe Place

"Why," asked a Missouri paper, "does Missouri stand at the head in raising mules?"

"Because," answered another paper, "that is the only safe place to stand."

NOURISHING FOOD AND GOOD HOURS

Help You To Resist Disease—Aid These With A Tonic To Keep The Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. You weaken this power of resistance by your general health run down, your blood gets thin and your nerves unsteady.

You weaken it when you worry, when you overwork, when you do not get sufficient sleep, and when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiate and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. C. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was in a much run down condition, suffering from many of the well-known symptoms of anaemia. My mother procured a supply of Dr. Williams' Pink Pills, and after taking about half a dozen boxes I was restored to normal health. Again after my marriage, and before my boy was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely broken in health. Part of the time I was under the care of two doctors, and for three months I was practically bed-ridden and in despair. Again at my mother's suggestion I started the use of Dr. Williams' Pink Pills. The result was that in a long time I could tell that they were helping me. Day by day I could get up and about, and was soon enjoying good health once more. In view of my experience I think I am safely saying there is nothing in the way of medicine better than Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Advertising His Want

She—And how is your bachelor friend?

He—When I saw him last he was mending slowly.

She—Indeed, I didn't know he had been ill.

He—He hasn't been; he was sewing some buttons on his clothes.

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

Rural Depopulation

Fathers of Our Farms Must Remember the Young Man's Needs

How shocking the facts would appear if we only had the statistics on how many young men have left the farms because their fathers drove them off! They just could not stand it any longer with their dads.

A study of this side of the question of rural depopulation would be illuminating. It is tragic what narrow-mindedness, bigotry, and prejudice, lack of vision, lack of appreciation, lack of sympathy and lack of praise and encouragement have done, and will yet do in robbing the farms of their vitals best young blood.

Surely the fathers of our farms must learn anew and remember the young man's needs—real and imagined—and his point of view; and give and get in return the requisite confidence, comradeship and understanding. Otherwise theirs is the loss—great loss indeed!—Rural Canada.

Bee Culture is Profitable in Alberta

Edmonton Apiarist Proves That Bee-Keeping is Profitable

Bees have proved themselves not only adaptable to the climate of Western Canada, but very profitable to raise as a side line, and as an example of this, the experience of Mr. William Wensel, of Edmonton, may be given. Mr. Wensel has been keeping bees for the last six years. The returns he has obtained from them go to show that they can be reared economically, and that the honey produced is fully equal to any of the imported variety.

Mr. Wensel started with a foundation swarm of mixed bees. By using only well bred queens, which he imported from Tennessee, he managed within a few years to so improve his swarm that he had an almost pure strain of Italian bees. He keeps from ten to fifteen hives of bees, disposing of the increase in the spring or fall.

From the standpoint of profit and profitability, bees can hardly be equaled by any other member of the animal or insect family producing food for human consumption. In the spring of 1918 Mr. Wensel had nine hives, three of which were in very poor condition. During the summer the nine hives increased to 21, and honey produced, less the amount left for winter feed, was eight hundred and twenty-seven pounds. The honey sells at from 35 to 40 cents per pound. In 1918 the record of production from the apiary was 100 lbs. per hive, or, at 40 cents per pound, \$40 worth of honey per hive.

Bees require very little attention in Western Canada. With a clover or alfalfa field in the neighborhood and supplied with sufficient comb and suitable hives, they will practically look after themselves for the whole summer. In the fall the hives containing the bees are either stored in a cellar or left out in the open. If the bees are left outside, a box large enough to cover the hive and leave a space of about four inches on all sides is put over the hive, and the space filled with chaff. An opening, however, is always provided. It has been found that when the hive is plugged up the bees will come to where the opening is and work until they die in their attempt to get out. On the other hand, when there is an opening they never go out unless on very bright sunny days.

Mr. Wensel's experience goes to show that it is better to winter the bees outside. They are not only more active and start to work earlier in the spring, but seem to be in far better health. However, if the bees are kept in a cellar over the winter it has been found best to take them out about April first.

Bees come out and are ready to start their season's work as soon as the warm weather begins. The hives are then cleaned out and the frames and comb put into place. From then on they require no attention until they start to swarm towards the end of May or the beginning of June. Between this swarm of the season, if put in a hive of its own, may hatch out a second swarm. One season one of Mr. Wensel's swarms that were hatched in June produced 99 pounds of honey the same season. It is the practice to take out some honey and put on a super with a queen excluded to induce honey production about the end of July. In September, all except 35 or 40 pounds of honey, which is left as winter feed, is taken out and the hives prepared for winter.

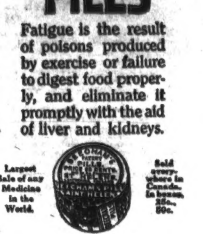

Prophecy Success

Gen. Sir Arthur Currie, before war a lawyer and real estate man, won an enviable reputation as a war leader and became the commander of the Canadian Expeditionary Force. He shows New World versatility again by accepting the office of principal of McGill University, Montreal, succeeding Sir Auckland Geddes, British Ambassador in Washington. Most fighting Canadians will prophesy for his success in his new post—New York World.

Stockholm, Christiania, Berlin and London, in the order named have the lowest death rates among the European cities.

When You Get up "tired as a dog" and sleep is full of ugly dreams you need BEECHAM'S PILLS

Fatigue is the result of poisons produced by exercise or failure to digest food properly, and eliminate it promptly with the aid of liver and kidneys.

Worth a Guinea a Box

Vanderhoof Has A Future

Bright Prospects Ahead of the Nechacko Valley District

A thriving British Columbia town that has a very bright future before it is Vanderhoof. Situated in the Nechacko Valley on the Grand Trunk Pacific railway, midway between Edmonton and Prince Rupert, it is the centre of a fine agricultural district, eminently suitable for mixed farming. The soil in the Vanderhoof district is almost inexhaustible and is easy to clear. The land in the Nechacko Valley produces wonderful crops of grain and timothy hay, as well as fine vegetables. Settlers are fast filling up the country, and the Soldiers' Settlement Board has placed a number of returned men on the land. The government is establishing a creamery at Vanderhoof, and undoubtedly it will become the centre of a great dairying district. Much of the land is suitable for steam plowing and the timbered area furnishes good shelter for stock. Sheep raising and mixed farming generally will prove very profitable.

There is fine fishing and good hunting close at hand, mineral wealth in the district, and a pleasant mild climate.

Age of the Earth

How old the earth, can only be guessed, and it would be a bold man who would say what the best figures are save the man who puts them there.

In 1860 John Phillips estimated the age of the earth at between 38,000,000 and 96,000,000 years. Considerable difference in one man's figures. C. D. Walcott estimated 70,000,000 as the maximum age. George H. Darwin has discussed the age of the earth from a purely astronomical point of view. From his theory of the earth-moon system he derived an estimate of more than 56,000,000 years.

Keep Minard's Liniment in the house.

New Building Material

Experiments are being carried on in building houses from marble dust and sawdust at Vancouver. It has been claimed that the cost of the house in construction will be six cents a foot in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills are these organs to action, they thoroughly cure indigestion and overcome the many annoying symptoms.

Town News

Mrs. R. H. Rogers left this morning for Portland, Seattle and other coast cities.

We have some splendid values in washing machines, see our stock—Morrison and Johnston, Ltd.

Leo Maddox and family, and Art Benson met with what might have been a serious accident on Sunday. While motorcycling near Haydon on Sunday, at a bad piece of road, their car jumped the track and turned over in a deep ditch, running the occupants underneath. Fortunately help was near at hand and the party was rescued without serious injury.

Miss Pye, left this week for Montreal, where she will undergo treatment for rheumatism at a well known sanatorium. Mrs. Elliott accompanied her to Calgary.

Capt. McCall, has notified Secretary Welsh that he will be at Lacombe Fair with two aeroplanes, and possibly a two passenger machine.

A conference of Baptist Ministers will be held at McLaurin Beach, Gull Lake, Monday, June 21st to Saturday 24th. Dr. J. L. Campbell, of New York will conduct classes and give lectures during that week.

We carry "The James Smart" Lawn mowers. This lawn mower has given splendid satisfaction. Intending purchasers would do well to try one of these machines. Morrison and Johnston, Ltd.

Rev. Ernest Thomas of Toronto, Secretary of the Board of Social Service of the Methodist Church, will speak on Prohibition in Grace Church, Thursday evening. He is sure an excellent speaker, so make it a point to come.

Progressive U.F.W.A. will meet at the home of Mr. and Mrs. O. S. Young on Wednesday, June 16, at 2 p.m. All ladies are invited to attend. Bring your family with you.

Refrigerators and Ice Cream Freezers—Morrison and Johnston, Ltd.

The Ladies Aid of the Methodist church will give a tea, sale of baking and sale of aprons on Saturday afternoon, June 26th. Further notice will be given.

Born at Rimby to Mr. and Mrs. S. C. Eason, a son, on Friday last.

Robert Sheets, commonly known as "Bob" left today for Stony Plain.

Baseball gloves, bats and balls at Morrison and Johnston, Ltd.

Robt. McKenzie is giving a silver cup as a prize for the best bats at the Lacombe Fair. The cup belongs to the property of the winner this year.

The Gull Lake Hotel has opened several families having taken up residence for the summer. The hotel opens in a few days.

R. Williamson is building an ice cream parlor at the lake. A full line of fruits and confectionery will be carried and in addition, lunches will be served at all hours.

Work commenced this week on the new office of the Jesse Fraser Agency, on Allan Street. The building will be of brick.

The sale of W. F. Graham's household effects will be held tomorrow, Thursday, at 1:30, at the residence of St.

There will be a "Prohibition" meeting in the Methodist Church this evening. You are cordially invited to attend.

The regular meeting of the W. I. will be held on Saturday June 12 at 3 o'clock at the Royal Hotel. The program will be given by Mrs. Roberts on "The Most Important Thing in Life."

By a score of 3-2 one of the best games of ball played this season resulted in a tie, when Red Deer met Lacombe here last night. The score was 14-4 or there about. The Lacombe team played good ball for the first 3 innings, but in the fourth, innifall brought in 9 runs to our 1. This inning was the deciding inning of the game. Our boys are getting in shape and will, we are sure, come figure in the league games, yet.

They still are in need of support from their town if they are to play ball this summer, and we are sure their trust in the citizens of Lacombe will not be misplaced. Be sure and turn out to their next game, on Tuesday next June 15th. The admission fee will be 25c, two bits, and as much more as you have a mind to give. All donations thankfully received.

Chop and chicken feed for sale at Lacombe Feed Store. Prices right. Wm. Meininger.

There will be a dance in the Comet Theatre on Tuesday evening, June 15, after the ball game.

Rev. Mr. Short, of Olds will conduct Anniversary Services at Morningstar last Sunday 11 am and 12:30 pm. On Monday evening there will be a social gathering when refreshments will be served and a good programme tendered. On account of these special ser-

voices there will be no service at Fairview and Milton.

Another Sale at Dagg's barn Saturday, June 19. J. R. Whitney, Auctioneer.

My next monthly sale will be held at Dagg's Barn, June 19. Any parties having stuff to sell, list it at my office as early as possible. J. R. Whitney

The Lacombe Elevator will re-open on June 20th for two weeks. After July 3 the elevator will remain closed until the new crop.

Bentley U.F.A. and U.F.W.A. On account of the U.F.W.A. Director, Mrs. R. Price of Stettler, who is making a tour throughout our district, the regular monthly meeting of the U.F.A. and U.F.W.A. will be held on Thursday, June 17th instead of Wednesday June 16th. During her tour, Mrs. Price will hold meetings at Lockhart, Gilbey, Medicine Valley and Bentley. The membership drive has closed, the U.F.W.A. coming out victorious with thirty six new members. At the next meeting, June 17, the U.F.A. will decide the date of the banquet.

Spring U.F.A. Social Everyone welcome to Spring Valley on Friday June 18—You will miss it if you do not come to enjoy the first effort of our brand new hustling U.F.W.A. The men's local had planned to make our next meeting a drive to increase the membership of both the Spring Valley Union and the Co-operative Association. When the ladies heard of it they decided to give us a real treat, doing the U.F.W.A. a good turn at the same time. Therefore we are having a few short talks on the need of the Co-operative association in the U.F.A. Movement, followed by a fine program of social songs.

On Sunday June 20th, Mr. Rogers is going to hold a U.F.A. Service in the school. We are hoping to have the assistance of the Joffre local and the Eclipse appointment. Please come and make it a success.

LAKESIDE U.F.W.A. A meeting of the above association will be held at the home of Mrs. S. C. Abbott on Thursday, June 17. Program: Roll call—Answered by the bringing of your favorite pie, pudding or cake recipe; Music by Mrs. Burke; Paper, "Farmer's Platform" by Mrs. Triggs; "Fair" by Mrs. W. Mitchell; "The Trials of Bread Baking," by the Newly Weds, followed by helpful hints by the ones more experienced.

Blackfalds W.I. The regular meeting was held at the home of Mrs. Ironsides. Twenty-two members and five visitors were present. One new member joined. Cars made to hold the annual picnic at Jack Fish Lake July 16th, when it is hoped a goodly number will turn out. The work of the Basins was taken up, and considerable progress is being made. It is requested that blocks for the quilt will be sent in to the August meeting. On account of the picnic there will be no meeting in July.

After the meeting had adjourned the ladies were entertained by Mrs. Hughes, Mrs. Billa, and Mrs. McNeil, and by Mrs. Tooley's delightful rendering of "The End of A Perfect Day" and "An Emblem."

Jackfish Lake Resort A local company has made a survey of Jackfish Lake, that beautiful piece of water about two miles south west of Lacombe, and will develop it as a summer resort. Already several citizens have secured building sites, and it is expected that summer homes will be erected this summer. A more beautiful place to spend the summer would be hard to find and no doubt this place will soon acquire popularity. E. E. Kitching will be pleased to take prospective buyers over the ground.

Lincoln News June 20th will be U.F.A. Sunday. As usual service will be held at 8:00 in the Lincoln School house. Everybody is cordially invited to attend the special service on June 20th.

Mr. J. E. Crook has made several trips during the last few days through our district. The last time he was accompanied by Mr. Hunt, road superintendent. They had the unpleasant experience of being stuck in the mud on a clear fine day, and therefore realize the necessity of fixing some of the roads. We hope it will not be long before work on the roads is started.

There was quite a large gathering at the U.F.A. meeting at Mr. P. Haas' place on June 1st. The young people thoroughly enjoyed themselves dancing until the small hours of the morning.

There will be a special meeting of the U.F.A. in the Lincoln School House on June 15th commencing at 8:00 o'clock sharp. "Co-operation" will be the subject under discussion. It is hoped there will be a good attendance. Don't forget the time and date.

Seeding in the district is well advanced, many residents having their seed all in. Mr. C. M. Carter expects to be well under way with the breaking of the Lacombe Public school land within a few days.

Basket Ball By Harney "The Lacombe Senior Public School Basket Ball Team was defeated in a game played with Ponoka on Saturday afternoon last. Our girls put up a good fight, but we are sure that with a little more practice they will be able to win from any team they play against. Both teams were evenly matched, and played the game well from start to finish. The defeat of our team was partly on account of two of our players being tired they having just finished playing with the other Public school team against Red Deer. Miss McDonald refereed the game and was fair and square with both teams. The Ponoka team was in a fighting mood before the game, and we think they were justified in being so as only one of our Basket Ball girls met them at the depot upon their arrival. This little act of unsportsmanship is a slur on the Lacombe Public school team. Surely any or all of our girls could have gone down to greet the visitors who arrived. However the Ponoka team made up with our girls and parted on the 26 train as friendly as ever with our team.

The game started at 4:40 p.m., and in the first period Lacombe did not score a basket while Ponoka scored 6 points.

After the recess between the two

periods, Lacombe scored 4 points to Ponoka's 0, leaving the score at the finish 6 to 4 in Ponoka's favor. We expect the next game to be played at Ponoka in two weeks' time.

Sunday June 13th English Church Service. Rimby 11 a.m., Lacombe 7:30 p.m. only. Sunday school 12 noon.

On Friday and Saturday evenings the special at the Rex will be Maur. To Tomorrow's great Drury Lane Melodramatic Success, "The White Heather," a picture play of the highest standard, and well worth seeing. In addition there will be a new comedy. There is no more pleasurable way of spending an evening than at the "Rex," and you do not want to miss this splendid picture.

For Sale 160 acres near Gilby, 4 miles from railway shipping point. Small house, Stable with loft. Corral. Poultry house, etc. All fenced. 35 acres cultivated. Blooming Railway Stations

Flower Beds at C. P. R. Station, Kenora, Ontario.

Flowers are amongst the assets of
the Canadian Pacific Railway. Flow-
ers bloom in C.P.R. gardens at most
of the principal stations from one
end of the country to the other.
There are flower beds outside the
Algonquin Hotel at St. Andrews, on
the Atlantic coast, and one of the
most beautiful flower gardens in Am-
erica blooms around the Empress
Hotel in Victoria.
In the old days most of the plan-
tations were too busy opening up the
untrodden ways to give much atten-
tion to the cultivation of flowers. Yet
flowers have progressed with the
commercial prosperity of the rail-
way. Flowers are now a part of the
thirty-one years since one of the
C.P.R. employees produced a few
plants of flower seeds in his own
plot and distributed them amongst
his friends at some of the stations.
The object of starting flower gar-
dening along the line. The start
was auspiciously made, and now the
C.P.R. has a fine display of flowers
at headquarters at Windsor Street Sta-
tion, Montreal. Mr. B. M. Winesap
is the horticulturist and forester.
Every year thousands of packets
of flower seeds, bulbs, trees, shrubs,
grass seeds and other plants are
distributed free of charge to station agents, section fore-
men, caretakers of round houses and
employees living on the property of
the company. The seeds that will

A Great Institution

During the last week of May some forty or fifty editors of Saskatchewan newspapers assembled at the University of Saskatchewan for their fifth annual convention and second annual short course for editors. For several days each year Saskatchewan editors live in a University atmosphere, not only holding their meetings within the college walls, but sleeping and eating in one of the student residence buildings and having placed at their disposal all the facilities of this institution of higher education.

What this means to the newspaper men it would be difficult to over-estimate, and that the editors appreciate the opportunities thus afforded them was demonstrated by an attendance this year two and one-half times larger than a year ago. The assistance and encouragement thus given the press of Saskatchewan by the provincial university is bound to have a markedly beneficial effect as the years pass in the raising of the standard of journalism in the west.

Reciprocal benefits must likewise unquestionably accrue to the University by reason of the closer relationship and understanding of the press toward that institution. By being brought into close personal touch with the University and learning of and studying the many-sided activities of that institution, the editors are coming to more fully appreciate the really wonderful work it is carrying on and directing in the interests of the people, and they will not be backward in bringing to the attention of the people the advantages obtained through a loyal support of the University.

In the course of a brief address to the editors, preliminary to an inspection of the University plant and equipment, Dean Rutherford of the College of Agriculture, quoted some striking figures as indicating what the education of farmers' sons means to them and to the country in actual dollars and cents, apart from the decided advantages in other ways which the educated man possesses over the uneducated. He stated that as the result of comprehensive surveys made in a number of States to the south it had been ascertained that, among farmers possessing equal means in the way of land, farm equipment and capital, the man with an education made a greater success than the man lacking such equipment.

Of farmers with equal opportunities in every respect, except in the matter of education, the following facts were established:

Those who attended the common school had a labor income for themselves of \$318.00 per annum.

Those who attended high school had a labor income of \$620.00.

Those who had attended college had a labor income of \$851.00.

A somewhat similar survey of Deane County, Ontario, had revealed the fact that out of 100 farmers surveyed, 98 percent had no education except that obtained in the elementary school, notwithstanding the fact that there were four high schools in the county, thus demonstrating the regrettable fact that the boys who attended high school had not gone back to the farms.

Why is it that the college educated boy makes such a greater success of farming than the one who lacks such training was revealed to the editors as they made their tour of inspection of

the University. On one part of the University farm extensive experiments were being carried on to demonstrate the value of crop rotation, and the best crops to follow each other. Other experiments had as their object the ascertaining of the best methods to prevent the blowing away of the soil, which is the cause of heavy losses annually when high prairie winds prevail. Elsewhere demonstrations were carried on to show the best type of horses, cattle, sheep and swine to breed in this country, and the nature of the crops which should be grown in connection with these types. In the well equipped farm mechanics building almost every type of tractor and other classes of farm machinery were in evidence where the students were trained in the handling and repair of machinery with a view to securing maximum results from their use. Lastly, through the agency of the Better Farming Train, which was standing on the university grounds, preparation was starting on its tour of the province, there was revealed the practical common-sense manner in which the university is carrying to the people far and wide the lessons learned as a result of its research work carried on at the university.

The University of Saskatchewan is unique among institutions of its kind that it embraces within the scope of its activities, not merely the arts and sciences, but everything that closely touches the lives and businesses of all classes of people, paying particular attention to the primary industry of the west, agriculture, whereas in most provinces and states agricultural instruction is quite separate and distinct from the universities.

The site of the University of Saskatchewan, consisting of 1,600 acres, is beautifully located on the banks of the Saskatchewan River, overlooking the city of Saskatoon. The magnificent buildings are built of native stone, obtainable only a few miles away, and year by year additional buildings are erected. Over \$2,000,000 has already been expended, and the ultimate plans call for the erection of a score or more handsome buildings and the expenditure of many more millions of dollars.

Catarrh Cannot be Cured

By LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions. MALL'S CATARRH MEDICINE will cure catarrh. It is taken internally and acts through the blood on the mucous membrane. MALL'S CATARRH MEDICINE is composed of some of the best toxic blood purifiers. The perfect cure of the catarrh in MALL'S CATARRH MEDICINE is a testimonial. Druggists sell. Testimonials free. F. J. Cheney & Co., Props., Toledo, O.

Smallest Wireless Receiver

Diminutive Portable Wireless Outfit Is Invention of a Britisher

The latest British wireless invention is a portable wireless telegraph receiver. The whole apparatus—two valve detectors, accumulator, dry battery, transformers and reaction coil—goes into a box which is only fourteen inches long, thirteen inches broad, and five inches deep. The cover of the box lifts off its hinges and forms a base with a pivot on which the receiver can be rotated so as to get the strongest signals according to the direction in which the waves are coming. A compass card on the cover enables the receiver to be set in the correct position for receiving from certain stations. With this little appliance, which weighs only 20 pounds, signals can be read in Great Britain from the largest stations in France and Germany as well as in England, without any additional wires. The signals, which are read in a telephone, are clearly audible in a reasonably quiet room.

Age of Niagara A Mystery

To the question, "How old is Niagara Falls?" geologists have returned replies varying by tens of thousands of years. At first it was estimated that the Niagara River came into existence through changes in the level of the land around the Great Lakes about 55,000 years ago. Later, it was reduced to only 12,000. Lyell increased the estimate again to 35,000 years and still later other scientists reduced it to about 9,000 years. At one period, it appears many thousands of years ago, the height of the falls was 420 feet.

Maximum Egg Production

Selecting Type of Hens For Their Laying Ability

Do you keep "just a few hens," and do they roam at large, laying eggs in nests of their own selection?

Or do you "keep hens"—bred to lay hens, and are you realizing the maximum in egg production from them?

Once in a while we find a farm flock where there is no effort made to select hens for egg production. True, the owner believes in giving the flock good and abundant feed, but puts no faith in the study of laying types and the keeping of trapezoid records. Soon, very soon, only enough birds are kept to supply the home, and so long as the flock produces sufficient eggs for breakfast every morning, he is satisfied.

But he is a foolish man. Look at the dairy industry—see how it is advancing because of the great improvement in breeding stock. If good cows will produce good offspring with the ability to produce large quantities of milk, doesn't it sound reasonable that good-producing hens should also produce a large percentage of their offspring with the laying ability stamped on them. Of course, not all a hen's egg production, but up to the standard of the flock, but we do know that they are more apt to be quality stock than the offspring of a scrub with a poor record.

Actually, it sometimes does seem like a joke to study laying types and try to estimate a hen's egg production. But it is not so funny to be using expensive poultry feed and not receiving eggs to sell. And it certainly is a great satisfaction to keep hens that pay their board and leave a profit to the owner after the board bill is paid.

Dairymen know what testing has meant to them. Now poultry men are finding what the test means in determining poultry profits.

At the Yarmouth Y. M. C. A. Boys' Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sunburn, an immediate relief for colic and toothache.

ALFRED STOKES, General Sec'y.

Empire Building by Air

In the course of one year the ends of the British Empire have been reached by aircraft from England. The Atlantic has been spanned, and the journey of over five thousand miles from Cairo to the Cape has been accomplished. Twenty-five years ago and more it was the dream of Cecil Rhodes to build a railway from Cape to Cairo. His geography prevented it. The airplane has at last given reality to his dream. And dreams not only his. To reach Cairo by air, one passes over the Icarian Sea, and the airway to India lies above Palestine, where Isaiah saw the vision of the six-winged Seraphim, and on through Assyria, where winged creatures adorn the palaces.

Minard's Liniment Lumberman's Friend.

SUNDAY SCHOOL LESSON
LESSON FOR JUNE 19
A SHEPHERD BOY CHOSEN KING

I. The Lord Rebuked Samuel For Excessive Grief (v. 1).

It was a bitter experience for Samuel to pronounce God's judgment on Saul. The cause of Samuel's grief was threefold.

1. The wreck of a promising life. In all history, perhaps, a life with greater promise cannot be found, and yet it affords no example of a more wretched failure.

2. A personal loss. No doubt as the spiritual adviser of King, Samuel found many things in him to admire. His removal, therefore, Samuel must keenly felt.

3. Anxiety for the national welfare. Samuel knew quite well that a change of dynasty oftentimes meant a severe war and the reign of anarchy. This would very seriously weaken the already weak kingdom. His concern for the people's good was therefore a part of his grief. One can readily see why Samuel should mourn, but as a prophet of God he should not have indulged to excess. The Lord's question, "How long will thou mourn for Saul?" has in it a rebuke for Samuel. Grief for others is a sacred thing, but whenever it is carried so far as to interfere with one's duty it becomes sinful.

II. Samuel Sent to Bethlehem to Anoint Saul's Successor (v. 1-5).

Though Saul failed, God is able to provide a successor who is better than he. Samuel is directed to go to Bethlehem and from among the sons of Jesse choose a successor. Samuel again shows his weakness in expressing his fear lest Saul should kill him. If God sends a man on an errand what matters it though a thousand Sauls be waiting to kill him? Even though it means death, if God sends who dare refuse or offer excuse? God instructed him to avoid publicity by the concealment of his real purpose.

Some may question the diplomacy of Samuel, but we remember that no one is under obligation to tell all that he knows, especially to parties who have no moral right to know. To withhold truth which is necessary morally to tell is duplicity which dare not be practiced. God allowed Samuel to hide his errand in order to shelter him from the wrath of Saul. The whole matter was already decided; the moral acts were already faced. The exposure of Samuel to the murderous hatred of Saul would have only made matters worse.

III. The Method of God's Choice (v. 6-12).

The elders of Bethlehem were somewhat alarmed when Samuel came. He, in the exercise of his judgment, went from place to place, and at times he doubtless had to deal in severity with the people. He calmed their fears by assuring them that he came peaceably, even to worship God. While the preparation or the sacrifice was being made, Samuel seems to have had the interview with Jesse and his sons. When the eldest of Jesse's sons passed before him he decided that this stalwart young man must be God's choice, but God told him that man looketh on the outward appearance, but the Lord looketh on the heart. We should learn, like Samuel was obliged to do, that the qualifications in God's sight for workers are inward, not bodily. The one who does God's work must do it by leaping upon him, not through personal strength or endowments. To the utter surprise of Samuel and Jesse, David the shepherd boy was chosen.

IV. Samuel Anoints David (v. 13).

When this strapping of a boy came before Samuel, the Lord indicated his choice. Samuel proceeded to anoint him. This anointing typified the endowment of the Holy Spirit, which is essential for any and all service for God. The preparation which David needed for the office of king was just what he got as a shepherd boy. God's choices are not arbitrary. As king, his responsibility was to defend, feed and lead God's flock, and this he had learned to do as he attended his father's flock. This promotion of the shepherd boy should be an encouragement for boys of lowly station in life.

The Death Warrant Delivered

No defence can be offered when you apply Putnam's to a sore corn. The tender foot is in danger of becoming a corn as quickly as corn as Putnam's Corn and Wart Extractor. Try Putnam's, it's free from acids and poisons. 25c. bottles sold by all dealers.

Ancient Hunger Strikers

Hunger-striking is not the modern development most people think. In the seventeenth century, Evelyn, the diarist, discovered cases and made notes of them. "I had the curiosity to visit some Quakers here in prison," he wrote of a visit he made to Ipswich in July, 1656, a new sect, who show no respect to any man, magistrate or other, proceeded to a fast was said to have lasted twenty days—but another, endeavoring to do the like, perished on the tenth, when he would have eaten, but could not."

He is a mean man who will let a woman marry him for his money when he hasn't any.

SCIATICA
Templeton's Rheumatic Capsules

Would you be rid of that grinding pain—thumping knee—throbbing sciatic nerve—stiff joints—swollen muscles—aches and pains—try Templeton's Rheumatic Capsules. Write Templeton, 148 King St. W., Toronto, for free literature. Sold by reliable druggists everywhere for \$1.00.

Templeton's RAZ-NAH Capsules. Write Templeton, 148 King St. W., Toronto, for free literature. Sold by reliable druggists everywhere for \$1.00.

New Settlers for Canada

First Contingent of the British-Canadian Farmers Land Syndicate

The tide of immigration that is now passing through Montreal to the Canadian West included the other day a study group of young English and Scottish farmers, forming the first contingent of the British-Canadian Farmers Land Syndicate, an overseas organization which has secured large tracts of land in what is called the Spirit River settlement colony in Alberta. In the West each settler is assigned 160 acres, or a quarter-section of land, with the option of adding another 160 acres when the first tract has been improved. The district they were going to is situated about 500 miles northwest of Edmonton.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. These are a mild, but thorough laxative which can always be depended upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them Mrs. Thomas A. Boyette, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation. The Tablets are sold by druggists, or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont."

Crop Prospects Good

Saskatchewan Department of Agriculture Issues Favorable Report

Crop reports prepared by the statistics branch of the Saskatchewan department of Agriculture make satisfactory reading, and conditions generally throughout the province indicate that the 1920 crop has got away to a good start, and given favorable weather, should result in a good yield. Damage by high winds varies from zero to 10 percent. The greatest damage from the cause having occurred in the central and southwest districts. In practically all cases where wheat was blown out, it is being reseeded to oats and flax.

Many large districts, however, report no damage, and the bountiful rains of May 25 and 26 are responsible for this situation.

While grasshoppers are reported to be hatching out in the southeast and central districts, they have as yet done no damage. They are small at present and in some localities are reported thick.

Heating Rooms by Power

Using an Engine to Extract Heat From Cold Air Outside

In a lecture recently delivered before the Institution of Civil Engineers in London, England, Sir Dugald Clerk revived an interesting proposal made by the late Lord Kelvin for the heating of rooms. This proposal is not easy to explain without diving into mathematics and the abstruse laws of heat, but it may be expressed as a process of using an engine to extract some of the heat from the cold air outside a room and adding it to the heat of the air inside the room. The curious and puzzling thing about this process is that the heat so added is under conditions much greater than the heat equivalent of the work done by the engine. In theory, therefore, an electric motor may be used very efficiently to warm a room. Whether the notion will work out satisfactorily in practice remains to be seen, but in view of the ever-increasing cost of fuel this fascinating problem is likely to be soon attacked by British engineers.

Tis the Truth That Hurts

Rate Subscriber.—Confound you stupid editor! Here at the wedding yesterday, instead of making me say I felt sure the bridegroom had many years of uninterrupted bliss before him, you report it "many years of uninterrupted bliss!"—Passing Show, London.

Japanese Fishermen Gaining Big Hold

Getting a Corner on B. C. Salmon Fisheries According to Statement

That the Japanese fishermen are gaining much too strong a hold on the salmon fishing industry in British Columbia was the statement made by Lieut.-Col. Peck, V.C., to the parliamentary committee on fisheries and re-establishment. Last year there were 2,277 Japanese licenses as against 417 native-born Canadians. The Japanese "jigged" their naturalization papers back and forth and so overcame the law which required naturalization before a license could be issued. Col. Peck declared that 30,000 more returned men had gone to British Columbia than the total number which were overseas from that province.

William Foran, secretary of the civil service commission, said that of 60,000 civil servants, 25,450 were returned men, but only 7,609 were permanent.

The commission had recommended after the armistice that no further appointments be made permanent until all Canada's soldiers were home. The government did not accept the recommendation.

Keep Tires Inflated

Soft Tires Are Comfortable But Also Expensive

Some motorists do not keep their tires properly inflated, giving as their reason that the car rides so much easier with a soft tire, and that when inflated to the pressure recommended by the maker, the car rides hard. If one can afford such luxury, well and good, but it is expensive comfort. Under-inflated tires means a greater consumption of fuel, a breaking up of their fabric due to the weaving movement and other stresses that separate the plies of the fabric, and shorten the life of the casings. With the cost of tires rising, it is economy to observe the instructions of the maker, and to keep the tires hard, to try to discover the real cause of the trouble and remedy it, instead of wearing out costly tires.

Every foot which you spare yourself by unwise under-inflation, will come back to you in another form when you find out how much you are out-of-pocket for tires.

After the Sea Lions

B. C. Fishermen Say One Will Eat 50 Pounds of Fish A Day

Large numbers of sea lions on the British Columbia coast, which destroy annually vast quantities of food fish may be slaughtered and their hides placed on the market to reduce the world's leather shortage. The proposal, first put forward by Premier Oliver, has the approval of many experienced fishermen. One Prince Rupert pioneer declared that with three companions he had killed 700 sea lions on the Queen Charlotte Islands in two days. The sea-lions, it is said, weigh from 2,000 to 2,500 pounds. The hides are one inch in thickness and make a tough and durable leather such as is used in workmen's gloves and saddles. Fishermen declare that a sea-lion will eat fifty lbs. of fish in a day.

Establish Western Danish Colony

A large party of Danes arrived at Quebec recently and will proceed to the western provinces with a view of purchasing large tracts of land and establishing a Danish colony. These men represent the prosperous agricultural class of Denmark.

Ask for Minard's and take no other.

The Persian Gulf and its coasts are in summer about the hottest place on the earth's surface, a temperature of 120 degrees in the shade being not uncommon.

You can make almost any man nervous by telling him that a policeman was asking about him.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" is the thumbprint of genuine Aspirin. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Advertising Bill for Recruits

The amount of money spent in newspaper advertising for recruits to the C.E.F. in all Canada was \$45,184, according to a return tabled in the commons at the request of Joseph Archambault (Chamblay - Vercheres). Of this sum, \$42,730 went to English papers, and \$2,444 to French. In Quebec \$6,238 was paid to English papers, and \$2,262 to French papers.

In Canada's 3,730,000 square miles there is room for the entire world population, allowing nearly one and one-half acres for each person.

France now has thirteen regularly licensed women air pilots.

This time of year

it's a good idea to combine fresh fruit or berries with your morning dish of Grape-Nuts

The blend of flavor proves delightful and is in tune with June.

"There's a Reason"

Minard's Liniment Lumberman's Friend.

At the end of 1917 Germany had more than 83,000 women metal workers.

Business Procedure Between Nations To Be Arranged

London.—A program of commercial procedure for nations of Great Britain, France, Italy, Belgium and the United States will be drafted at the initial meeting of the international chamber of commerce in Paris from June 12 to July, with the view of suppression of unfair competition, acceleration of transportation of raw materials, reconstruction of the war-devastated region, the economic organization of the new states and stabilization of exchange.

This agreement was reached here at a meeting of the general organization committee. The committee decided to direct the drafting of a report on the desirability of prohibitions on imports and exports to protect national markets against competitors enjoying a better rate of exchange and against "unreasonable purchases and aggravation of the depreciation in the rate of exchange."

For Relief Work in Europe

Several governments have arranged to help in rebuilding the Central Countries.

Paris.—New and substantial credits for the relief and reconstruction of Central European countries, including Austria and Hungary, have been arranged by the governments of Great Britain, Denmark, Holland, Norway, Sweden and Switzerland. The credits are mainly in the form of raw materials and food and although the United States is not officially represented on the committee, it is co-operating in a large way, it is stated, by providing commodity credits for Central Europe.

Japan Suspects Plot

Negotiations for Buffer Siberian State Are All Off

Honolulu.—Japan has broken off negotiations with the Russian Bolsheviks for the formation of a buffer state in Siberia, according to a Tokyo cable to the Nippon Jiji, a Japanese newspaper here.

The breach in negotiations came about as a result of Japan's discovery of a plot to undermine General Semenov, commander of the all-Russian forces in Siberia and bring the Baikal region under the Bolsheviks, the cable stated.

Importing Beef From U. S.

Winnipeg.—Several carloads of beef have been imported into Winnipeg from the United States, according to information received from a local firm of livestock commission brokers. Imports would continue as long as it was possible to dispose of good stock.

At present the majority of cattle obtainable locally were not "finished."

Problems of West Discussed at Big Industrial Congress

Calgary.—The second annual industrial congress opening at Calgary attracted several hundred business men and farmers from all parts of the country. A feature was the appearance of 200 members of the Canadian Manufacturers' Association and the weather man was on his good behavior. President M. A. Brown opened the congress, and premier Stewart welcomed the delegates and visitors. In his address he emphasized the value to the country of the organized effort that had made the meeting an annual affair. As president Howard of the manufacturers' association said the work of the congress is on a big scale, managed by men of vision who are helping put the west on the map and develop a spirit of co-operation throughout the Dominion. Col. Dennis discussed irrigation, one of the important problems of the west, and F. H. Peters, commissioner of irrigation, talked along the same lines. T. A. Hornbrook, president of the board of trade, and mayor P. C. Marshall, of Calgary, added their voices to the general note of welcome. The speeches were concluded by R. B. Bennett.

Hon. Geo. P. Smith, speaking as the representative of the province, said that the province was anxious to encourage a well rounded business condition. He knew there was some uncertainty in general conditions but he believed the city just as necessary as the rural district. All classes are necessary in this day of complicated social conditions. The province is anxious to encourage manufacturing industries, but only those which find conditions here reasonable and natu-

Sinn Fein Gain Ground

Carson's Followers Are Now Being Defeated in Elections on Own District

Belfast.—Followers of Sir Edward Carson have been defeated in county and district council elections in their own strongholds in choosing boards of guardians. In addition to the Sinn Feiners winning of County Tyrone for the first time and maintaining their hold on County Fermanagh, Michael Carson was unseated by the Belfast council following his sentence of hard labor for an alleged seditious speech, headed the poll in the Spinnahill division.

A Sinn Feiner was elected in Lisburne.

Budget in Committee

Luxury Tax Will Likely Be Subjected To Some Changes

Ottawa.—The formal budget debate out of the way, consideration of the budget resolution in committee will open with the least possible delay. Here, in all probability discussion will be protracted, covering possibly a week or so. Provisions made in regard to income tax and business profits tax are expected to go through without a doubt.

The luxury taxes will be subjected to some changes, it is thought, particularly with a view to making their administration more workable. Since the budget was brought down the minister of finance has been in constant receipt of representations with regard to the luxury taxes and the sales tax. Important points have been brought up and notice will no doubt be taken of some of the suggestions. In addition to any amendment which the finance minister may propose, it is likely that a number will be submitted by members of the opposition.

Britain Builds Huge Airship

R-80 Will Be Equipped With All The Latest Improvements

Barrow, England.—Airship R-80, built here for the admiralty, will be launched in two or three weeks. She embodies the latest improvements in aircraft design and it is stated that she would fly across the Atlantic with ease. The vessel is 535 feet in length and 70 feet wide. Her lifting power is 38 tons. Four engines, each of 240 horsepower, will give her a maximum speed of 65 miles per hour. She will carry a crew of 15.

Liquor Seizure

Spokane, Wash.—Twelve cases of bonded whiskey from Calgary, Alberta, were seized by the police in a private residence here.

Object to Tax Method

Canadian Credit Men's Trust Association Condemns New Budget Proposals

Winnipeg.—Sweeping condemnation of the method adopted by the government in the new budget to obtain increased revenue, was explained at a meeting of the Winnipeg branch of the Canadian Credit Men's Association.

While recognizing that the government had to be adequately financed, the credit men declare that the luxury and excise taxes would produce such serious dislocation of business that the original aim of the government for the collection of more revenue would be defeated.

No Military Compulsion

Signing of Peace Treaty Has Rescinded Conscription In Germany

Berlin.—It is semi-officially announced that no law will be enacted abolishing compulsory military service which is demanded by the peace treaty, because the national assembly's acceptance of the treaty automatically rescinds the former compulsory conscription. This objection has been issued in view of the allegations that Germany is not carrying out the provisions of the treaty.

It is also announced that the minister of defence will issue a decree forbidding discharged soldiers to carry service rifles and hand grenades. This order is somewhat belated, as according to reports, thousands of discharged men all over the country are in possession of their full arm outfits. A few days ago the police seized, near Hannover, 194 hidden rifles and 190 swords and 10,000 cartridges.

Value of Good Railways

Hon. S. J. Latta Speaks of the Importance of Good Roads

Winnipeg.—The keynote of all good work in western Canada, and for that matter throughout the whole Dominion, was struck by the Hon. S. J. Latta, minister of highways for Saskatchewan, at the conclusion of the Canadian Good Roads convention when he affirmed that the essence of patriotism was the home, and that the things that touched the home the nearest was transportation facilities. The minister had been describing the new Canadian problem, and noting the making of the immigrant of European nationality a British citizen and he impressed his hearers that they had not only to get these people to understand the institutions of Canada, but they had to get them into a receptive frame of mind for the work they were to do. He said, then getting them to love the country, because of what the country was doing for them.

Some Profit in Clothing

Farmer Sold Wool For Fifty Suits and Got One With the Price

Toronto.—The Globe published the following despatch from Hickman, Ky.

Roy Shaw, a well-known farmer living near Hickman, took 200 pounds of wool to Hickman the other day, which he sold for 30 cents a pound, or for \$60.00. Then he purchased a suit of clothes for his son, and found that the money he received for the wool was just enough to pay for the suit. He says there are about four pounds of wool in a suit of clothes, and on that basis the wool he sold will make fifty suits, which is sold at \$60 a suit, would bring the seller \$3,000. Allowance for the labor and other materials going into the suit, somebody will get a return of \$1,500 on a \$60 investment, he figures.

Weather Aids Wheat Crop

Brandon.—The rains and cold weather of the past few days have been of immense benefit to the crop in the Brandon district. One week ago, due to the dust storms, many fields looked brown and bare. Today everything is green and the roots of the wheat are driving deep down in the earth, making for a vigorous and sturdy growth and a promise of ability to withstand drought, should there be one at a later date.

Monks Drowned at Montreal

Montreal.—Two monks of the Marist Freres were drowned in the Laval Rapids, when the current overturned a boat they were fishing from. They were Brother St. Halmar and Brother Malachi Ferrie.

The former was fifty-seven years old and had been in the service of the church for 40 years. The latter, who was only 27, had been initiated four years ago.

Geddes Given Honorary Degree

Washington.—George Washington University, at its ninety-ninth annual announcement exercises conferred the honorary degree of Doctor of Laws on Sir Auckland Geddes, ambassador to the United States. Ambassador Geddes has been delivered the commencement address.

W. N. U. 1319

Cowardly Attacks in Ireland

Five Members of Irish Constabulary Beat Back Five Hundred Rebels

Toronto.—The Toronto Evening Telegram published the following despatch from its correspondent at Belfast, Ireland: "Boys, don't mind me. Stick to your posts," shouted Sergeant Fitzpatrick of the Royal Irish Constabulary, at Crossmaglen, 20 miles from Belfast, when he went down with a bullet through his lung while defending the barracks with five men, against an attack of five hundred rebels.

The attack lasted two hours, during which the barracks were sprayed with petrol. The police fought stoutly, and wounding several raiders, succeeding in beating them off. The raiders spoke in Irish when commands were given.

Fitzpatrick, a native of Fermanagh, and Constable Rafferty, conducted the defence. After Fitzpatrick was badly wounded, though he was so badly hurt he had to lie bleeding on the floor, he still managed to counsel what to do in moments of distress. Constable Carry was wounded in the knee by the rebels.

The attack on Clare barracks, Kings County, cost the rebels three killed and several wounded. Hand grenades knocked over several raiders. A man's jaw and a finger and a cap with a bullet hole through it were found on the scene by the military who came to the rescue.

Equality for Dominions

Free Sister States Are United Under One King

London.—The Daily Chronicle publishes a special interview with General Smuts at Capetown in which he reiterates that the war transformed the Dominions into sister states.

"Unfortunately the old machinery still remains," adds the general, "and it is astonishing that statesmen have not yet realized the anachronism. I have insisted on a constitutional change in the empire and I am also astonished that others have not been equally impressed with its inevitability. The British people must realize this great constitutional fact that there must be a complete equality and freedom enjoyed by the sister states and united by the king. Your constitutional problem is to find new formulas to fit new conditions."

General Smuts in the course of this interview, apparently made no statement concerning the present domestic and political situation in South Africa.

Appeal to Unions

Irish Ask British Workers to Refuse to Handle Munitions

Dublin.—The strike committee in Dublin issued a manifesto to the workers in Great Britain asking them to "support our minds of the religious and political atmosphere of the question," says the manifesto, "and face it in the same light you landed on the shores of France to fight the Prussian there."

London.—David Lloyd George, the premier, received a deputation of the National Union of Railway Men with reference to the movement of munitions to Ireland, said the London Times.

The Times asserts that after the railway men had put their case before the premier, he made a forcible statement declaring that the government would do all in its power to maintain law and order and that the railway men seemed to be somewhat surprised at the uncompromising nature of the premier's reply.

Respect Wishes of Canada

Do Not Consider It Advisable to Publish Correspondence

London.—In the house of commons recently the colonial under-secretary of state said it had been agreed by the British and Canadian governments that it would be inadvisable to publish at present the correspondence regarding the appointment of a Canadian representative at Washington.

Percy Hurd and Sir Richard Cooper denounced somewhat at this answer but Andrew Bonar Law said that the British government must consider also the desires of the Canadian government in such matters.

Burned British Flag

Washington.—The United States department has asked the District of Columbia commissioners for a statement of fact as to the burning of a British flag in front of the Treasury by women sympathizers with Irish freedom.

Doukhobors Selling Out

Lethbridge.—The Doukhobors, who have large holdings at Lethbridge and nearby, have sold part of their land. It is believed to be the starting of a movement on the part of the colony to leave Alberta.

Munitions Decisions June 16

London.—A meeting to decide whether a special workers' convention would be called to consider the boycott on handling munitions for Ireland is to be held June 16 by the parliamentary committee of the Irish trade unions.

Abandon Tax Levy on War Wealth

London.—The cabinet council has decided to abandon the idea of a tax levy on war wealth, which has been suggested by cabinet special committee.

U. S. House Getting Tired of the Rebel Agitators

Washington.—Irish supporters in the house were confronted with a refusal by Speaker Gillett to grant the floor to any member for the purpose of calling up the resolution expressing sympathy for Ireland, because of lack of time. The resolution had been favorably reported by the foreign affairs committee and had been turned over to Representative Mason, Republican, Illinois, who was to handle it on the floor.

Mr. Mason, in a letter to Chairman Porter, referring to the resolution said that the speaker had informed him that he "or nobody else would recognize it."

Minimum Salary for Ministers

Winnipeg.—Two thousand dollars a year as a minimum for the minimum remuneration for a married Methodist minister was endorsed unanimously at the fourth quarterly meeting of the Methodist South District.

Equality for Dominions

Free Sister States Are United Under One King

London.—The Daily Chronicle publishes a special interview with General Smuts at Capetown in which he reiterates that the war transformed the Dominions into sister states.

"Unfortunately the old machinery still remains," adds the general, "and it is astonishing that statesmen have not yet realized the anachronism. British Marines Are Sent to Ireland To Maintain Order

Protest Against Decision

Say Italy Deserves Same War Indemnity As Belgium

Rome.—The entire press protests against the decision of the Hythe conference granting Italy only seven percent of the war indemnity while Belgium is granted ten percent. The Tribuna says:

"We are the first to bow to the heroism and sacrifices of the Belgian people. On the field of financial reparation, however, we must point out that Belgium had only a limited zone really devastated, that her stolen cattle were returned and her machinery which was removed, restored in greater part."

"Belgium had 40,000 dead, whose sacrifice we venerate, but we could not forget the 650,000 Italians who died on the battlefields or in hospital and the 580,000 maimed, whose orphan the government must provide for. The Italian delegates at Spa must be firm in strenuously defending Italian rights and interests."

The Newspaper Situation

Sir Henry Drayton Tells Manufacturers Government Will Insist On Domestic Supply

Ottawa.—The conference with the newspaper manufacturers announced in the house took place in the finance minister's office. Sir Henry Drayton told the manufacturers that the government was much disturbed to find that, knowing the agreements made last fall, twenty-five percent of the daily newspapers in Canada were facing the period of suspension owing to inability to get newspaper paper, although willing to pay current prices for paper to foreign countries. He said the government would insist upon the domestic requirements being supplied as they represent only 15 percent of the total production.

The situation is still regarded as very serious. The publishers are emphasizing the point that the total amount of newspaper newsprint in the continued existence of the 26 daily newspapers affected represents less than two percent of the exports of newsprint and that they ask for no favors regarding price.

The publishers state that the great majority of the mills are keeping their Canadian customers supplied, and that the present crisis has been caused by the attitude of a very small minority.

Troops Are Gathering

Sensational Reports of Concentration Of Bavarian Forces Comes From Potsdam

Berlin.—The Tagblatt publishes under reserve sensational reports of the concentration of Bavarian troops in the neighborhood of Potsdam, and that Prince August Wilhelm, of Prussia, son of the former emperor, is playing a prominent part in the movement. It also publishes a rumor that the authorities intend in future to arrest all pacifists and a number of prominent Leftists.

Rain Ends Forest Fires

St. John, N. B.—Heavy rain in Northern New Brunswick and other districts put an end to the menace of many fires. Two new fires were reported near Newcastle, and another on the southwest Miramichi, but they are under control. Situation in Victoria and Madawaska counties is much improved. The fire at Glenora on the Fredericton and Grand Trunk railway in Sanbury county, has burned about 1,200 acres.

Chief of Police

St. Paul, Minn.—Thomas E. Campbell, for three years chief special agent in the Minnesota bureau of investigation, department of justice, has accepted the post of chief of police in St. Paul, effective June 6.

Shortage of Laborers in West

Calgary, Alta.—That the west could absorb at least 20,000 men for railway construction, farm work and mining, was the statement made by Grant Hall, vice-president of the Canadian Pacific Railway, in the course of an interview here.

D. C. Coleman, vice-president of western lines, who was also present, confirmed this great shortage. They stated that there was a scarcity of unskilled labor in the east today, also, but not to the same extent as in western Canada.

Britain is Not Yet Prepared to Trade with Russia

Trade relations in the general interest of Europe.

The premier said that M. Krassin was the head of the delegation representing the Russian co-operative organization, but he was also minister of the soviet government and, as such, no doubt was acting in the name and under the authority of the Soviet government.

One of the members asked whether Krassin was not originally a German agent. The premier said he did not think he was, but that he was associated with a German firm of electricians. He was a Russian.

The members enquired whether it could be taken that the perturbation of the French public was without any foundation and that the negotiations were being acted upon. The premier replied: "I am not aware that there is great perturbation in France. The mere fact that some French newspapers are trying to foment trouble between two friendly and allied countries, whose friendliness is essential in the interests of the world, is no proof of French perturbation. This was received with cheers."

Representatives of the French and Italian governments are in London.

It was further decided, said the premier, that the allied delegates must clear these questions out of the way herself, the premier added, after which allied negotiations could proceed.

It was further decided, said the premier, that the allied delegates were prepared to deal with the Russian delegates as to the best methods of removing the obstacles and difficulties in the way of resuming peaceful

MILLINERY

Only a few more weeks of the Millinery Season to run. Get your requirements while the getting is good. We have some real good values to offer.

Two Kinds of Economy in the Post-War Maxwell

THE Post-War Maxwell inherited from its 300,000 predecessors two traits that captivate the person who likes continuous, uninterrupted, comfortable and low-cost mileage.

One is its freedom from repairs. It runs on and on. Give it gas, oil, grease and water and it will deliver an amazing amount of mileage.

The second is the low price you pay per mile. Its thirty engine with Hot Spot and Ram's Horn, makes gas go a long way. Its 2,000 pounds of weight assures long tire wear.

Such kinds of economy came from years of study and the experience which 300,000 previous Maxwells have taught.

The notable improvements and refinements to be found in this car have caught the attention of many who figured that high efficiency meant high price.

A demonstration of the Maxwell will convince you that a fine motor need not involve an extravagant outlay. Call at our showroom, let us let you know you are interested, and we will call at your home—with a Maxwell.

Terms—To insure \$12.00; Season \$18.00. Description and pedigree on application. First class government inspection certificate. I. O. Coverdale, Owner.

W. C. T. U. Convention at Wetaskiwin.

The eighth annual convention of the W.C.T.U. of the Central Alberta district was held in the Methodist Church at Wetaskiwin on Wednesday and Thursday, May 26 and 27th. The proceedings of this convention, though prepared in a hurry, proved to be one of the most interesting and helpful yet held. There were three sessions in all, the first of which opened at 2 p.m. Wednesday with the President Mrs. E. M. Sharpe of Lacombe in the chair. Twelve delegates answered the first roll call and several others came in on the evening train from various other points. The different papers read showed careful preparation even though all were arranged for at a late moment. The many latest points brought out in the several essays, would, if developed, prove a source of moral strength to any individual or organization.

At 6:30 p.m. about thirty-five W.C.T.U. members besides the local clergy, sat down to supper in the side rooms of the church. The refreshment committee excelled itself in the attractive arrangement of the tables as well as the delicious edibles placed before the guests. At 8:15 the evening session opened with a crowded church. A hymn was first sung after which Rev. Mr. M. Pritchard, D.D. in prayer. The audience was then favoured with a piano duet by the Misses Raden and Chandler. A choir of six from Grade VIII of the Alexandra school sang two festival choruses during the evening, under the direction of their teacher Miss Coleman. Everyone present appreciated the rendering of the music by the children. The evening was however, an address by Rev. G. A. Clarke of First Baptist Church, Edmonton. This gentleman is a returned soldier and elucidated several of his points by referring to some of his experiences overseas. His address was presented in a forceful, unhesitating manner, so that attention of the audience was strictly held throughout. The coming referendum was the theme of the whole Convention, but especially so in Mr. Clarke's lecture. The speaker began by pointing out the many things which concern us in our national life, and one of them was the persistence of the nation, liquor traffic, with its methods of the submarine but there were many things to cheer, one of them being the way in which the women of Canada are throwing themselves into the task of nation building—the W.C.T.U. having done the pioneer work and struggled against tremendous odds. It is the inter provincial trade that has to be stopped; the only question at stake being "Do you want the prohibition of the importation of liquor into Alberta for beverage purposes?" The "personal liberty" cry is the most selfish and of the lowest form imaginable, because the personal liberty advocate must have what he wants without regard to the common good of the community. As long as democracy stands the rule of the majority must obtain. What would have happened to the personal liberty advocate if the youth of Canada had said that we must be allowed to choose for ourselves, whether or not we obey the commanding officer? If this had been acted upon during the late war, we would now have no personal liberty to argue about. The "Moderation League" will also carry on an insidious propaganda. We must give the youth and manhood of our land a chance to

Music by the Junior Choir.

Regular church-going takes away that grouchy feeling.

grow up sober and decent citizens. There has been difficulty in enforcing the Liquor Act. The privilege of taking physician's prescriptions has been abused etc. but in spite of failure in certain details, conditions are vastly different from what they were under the old regime. The reasons for passing the referendum are: (1) For the sake of a child; (2) For the sake of our nation. Mr. Clarke summed up his address in the following lines, "There's the work of God half done. There's the kingdom of His Son. There's the triumph just begun."

"To you this task is given, By you the bolt is driven By the very God in Heaven Put it through."

Rev. Mr. Wilkin in a few well chosen words, then welcomed the delegates to Wetaskiwin, after which a collection was taken up and the National Anthem sung.

The Thursday morning session was largely taken up by the reading of reports from the various unions of the district; each showing increased prosperity in the work.

The following are the district officers for 1920:
President—Mrs. E. M. Sharpe, Lacombe.

Vice-President, Mrs. Coole, Clive. Treasurer, Mrs. H. W. Brown, Olds. Recording Secy—Mrs. A. E. Miller, Wetaskiwin. Corresponding Secy—Mrs. J. I. Poole.

Limbey News

The railway buildings are now completed, the round house is nearly ready for use, the elevators will be ready for this year's crop—in fact Limbey is booming. Ben Limbey is busy getting out the foundation for his new store; deep wells are being drilled, the new printing office of the Limbey-Troener will be ready in a few weeks, a large livery and feed stable will be erected at once, and town lots are selling fast. This is the news brought to town last week by W. B. McGillivray, selling agent for the new railway townsite. By fall, Mr. McGillivray says, there will be ample accommodation for man and beast close to the elevators and railway, which will do away with the great inconvenience to the farmer who at present has to haul his grain to the railway and then drive up to the old townsite for meals or stabling for his horses. It is expected that at least one bank will locate near the depot before winter. Visitors are greatly impressed with the possibilities of the town, the townsite is ideal and water can be procured easily. The railway company will begin the construction of one of the buildings at once. Tenders have been called for the construction of the line six miles past Limbey, the intention being to get to a gravel pit, as balancing on the line will be hushed this summer.

Master Mechanic, W. D. Brown moved with his family to Limbey this week and has taken up residence in the new cottage near the depot.

Your Eyes

Do not neglect your eyes, your greatest asset. If you are troubled with headaches, in the majority of cases eye-strain is the cause. Have your eyes examined by a thoroughly competent graduate optician, who will fit you with the required glasses.
